

Use PKS NETPlan[®] to reduce your email overflow!

Today, about two thirds of all business relevant information are sent by email – an estimated 42 billion emails per day.

You want to reduce your email flood? Then use PKS NETPlan[®]! Do not waste your time by storing your documents or by extracting tasks and appointments – things that are rather time consuming.

Keep the overview of your inbox!

Benefit from the following advantages PKS NETPlan[®] offers you:

Clear lists and efficient storage structures

PKS NETPlan[®] – your system for project communication and project management – does not only offer you clear to-do lists. With just a few clicks you categorise your documents and can immediately find them again. Save yourself the effort of browsing and clicking through the folders. Win precious extra time for the things in your project that really matter.

Everything in sight – at any time

Define who will work at what time on which task. It's up to you to decide if you want to be informed about the current process state of your assigned tasks. With this you easily keep track with everything.

Transparent task lists

You have questions regarding your task? You want to make your results available to the other editors? It could not be easier! You can do this directly in the to-do list of the document. Your comments are immediately listed, and others can immediately comment on them. This is documented project communication!

Automatic monitoring of deadlines

The automatic alert function PKS NETPlan[®] offers you helps you to keep informed about the expiry date of a deadline. Adherence to schedules has never been so easy.

Store the whole correspondence – even if it is backdated

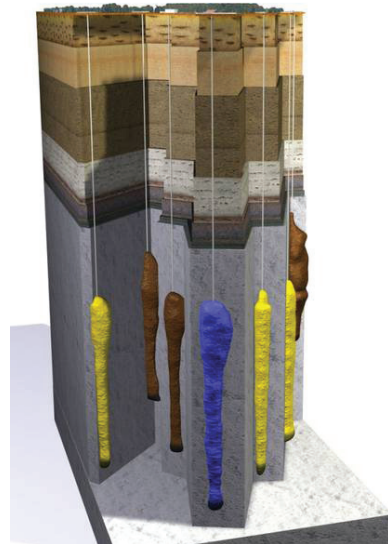

Even if you are already in the middle of your project you can start using the system. The PKS NETPlan[®] Document Management allows you to store the whole correspondence – from the beginning on. With this, you have both the recent and the earlier correspondence in sight.

New Projects

The PKS NETPlan[®] team is glad to have received the assignment for the following new projects (among others):

Extension of a cavern storage facility

In the municipality of Friedeburg, near Wilhelmshaven, a cavern storage facility is being extended. For this purpose, an estimated number of 45 additional caverns will be leached in Etzel in the coming years. According to the operator, these caverns can be used as storage facility for oil and gas. At the moment, documents for the mining approval process are being prepared. The PKS NETPlan[®] module *Document Management* is facilitates the close cooperation within the interdisciplinary team.

Salt Cavern Modell

Branch Canal to Salzgitter

In the course of the extension of the Mittelland Canal, the approx. 18 km long branch canal to Salzgitter is being extended and deepened. This project aims at making the canal navigable for ships and pushing units with a draught of 2.80 m when fully loaded. In this project, the consortium a Ingenieurgesellschaft Planung Stichkanal nach Salzgitter is work with the PKS NETPlan[®] modules *Document Management* and *Drawing Management*.
